UD Trucks Corporation

Going the Extra Mile

Benefits of UD Telematics Services with the new UD Data Interface

To maximize the profitability of your business, you need to be able to manage your fleet effectively, keeping it on the road longer while reducing running costs.

UD Telematics Services will help you improve your profitability by maximizing vehicle uptime and fuel efficiency while reducing unplanned stops and operational costs. UD Telematics Services integrates a host of features designed to support you and your business.

With our new UD Data Interface, you will be able to extract data directly into your system. This will allow you to have streamlined access to your data and will ensure that your time is better spent on managing your fleet.

1
Keeps you up to date about your business

UD Telematics Services provides you with full visibility of your vehicles for efficient fleet management. Tracking and tracing your vehicles has never been easier thanks to the user friendly interface of the UD Telematics web portal and mobile app, to ensure visibility of your fleet is always at your fingertips, even while on the move.

2
Provides essential fuel optimization

UD Telematics Services allows you to generate and analyze easy-to-read reports on fuel utilization and driving behaviour, thus simplifying the management of your fleet. Improvements to driving behaviour will lead to more efficient fuel consumption, ultimately resulting in significant cost savings for your business.

3
Helps manage fleet uptime

UD Telematics Services strives to provide support in maximizing vehicle uptime. Be it through regular preventive maintenance planning, remote assistance or fuel advice services, we want to work together with you, ensuring your business can go the extra mile.

Introducing the new UD Data Interface

Manage your fleet data using your software.

Overview of UD Telematics Services

REAL TIME TRACKING ensures that you have a precise overview of the location of your fleet – keeping you in control. You can plan alternative routes in the event of traffic congestion.
TRACE allows you to extract vehicle history data when the need arises. Useful for incident investigation and is available as a text-based report or a graphical interface.

UD PROACTIVE SUPPORT is designed to help you increase your vehicle uptime. It includes 4 aspects.

GEOFENCING allows you to draw virtual boundaries on the map which can alert you with customized messages when your vehicles cross these boundaries. It can also monitor speed limits and will alert you when deviated.

FUEL UTILIZATION REPORT can be easily generated and analyzed for potential areas of improvement so that fuel savings can be identified and optimized through advanced driving techniques.

FUEL LEVEL CHANGE ALERT informs you when there is a sudden drop in fuel detected, providing crucial vehicle information for immediate investigation.

DRIVING BEHAVIOUR monitoring provides you with added visibility on how your vehicles are driven by detecting harsh acceleration and harsh braking, overspeeding, seat belt usage and excessive idling.

PREVENTIVE MAINTENANCE PLANNING helps to keep the service plan updated and ensures that your truck comes to the workshop at the right time.

VEHICLE HEALTH MONITORING pre-identifies selected fault codes and automatically alerts your UD dealer when a potential problem arises.

REMOTE CUSTOMER ASSISTANCE provides your UD dealer access to the location of your truck and relevant diagnostic information in the event of a breakdown.

FUEL ADVICE SERVICES help develop optimum driving performance and skills to improve fuel efficiency and reduce costs.

UD Telematics Mobile App

The UD Telematics Mobile App provides you with clear visibility of your fleet while on the move with a user friendly interface. Managing your fleet has never been easier!

The UD Telematics Mobile App is currently available on Android and iOS devices for maximum compatibility.
