

NISSAN DIESEL MOTOR CO., LTD.

**ENVIRONMENTAL REPORT
2006**

From the Editor

Nissan Diesel Motor Co., Ltd. has issued an environmental report each year since 2001. All reports have focused on measures that we are taking to lower our impact on the environment.

In this report, which is our sixth issue, we have revised the content and layout to include information about our position regarding the relationship between our trucks and buses and the environment.

This report concentrates primarily on environmental activities at Nissan Diesel during fiscal 2005. We have also devoted space to the environmental programs of Group companies and to corporate social responsibility.

We view the environmental report as a valuable means of communication with all our stakeholders. We hope that this information will give them a better understanding of our commitment to corporate citizenship and how we are translating that stance into specific activities.

Period covered:	Fiscal 2005 (April 1, 2005 to March 31, 2006) (Also includes some items after March 2006)
Scope of data:	Head Office / Ageo Plant, Kounosu Plant, Hanyu Plant, Gunma Part Center and Group companies
Guidelines:	Environmental Report Guidelines (2003) issued by the Ministry of the Environment
Date of issue:	September 2006
Date of next issue:	September 2007
