

## **SUBJECT: Road Speed Limit Parameter Setting**

Department: Service  
Section: General  
Model(s): GH7 ENGINE  
Model Year(s): 2011  
Effective Date: August 31, 2016  
Form #: TB GE-44  
Rev #: N/A  
Supersedes: N/A

**Purpose:** Road speed limit setting on 2011 model year requires the import of a Template prior. The Template will override the factory setting in order to set the required speed limit. NOTE: 2012 & 2013 model years do not require the Template.

**Procedure:** Download the Road Speed Limit Template from the service website listed under Technical. Save the template to your hard drive.

1. Connect to the vehicle and navigate to the Parameter Programming operation.
2. Start Parameter Programming in order to read out the parameter values.
3. Click the Template View button on the Parameter Programming screen and click the Import Template button in order to import the "UD\_RspdLmit" template.
4. Click on the template within the template window.
5. Click on the Apply Template button and confirm that you want to apply the template.
6. Click the Template View button in order to close the template view.
7. Click the Continue button in order to complete the parameter change, and confirm the change that is to be made (changing parameter DV from 83.9 mph to 55 mph).
8. Change the roadspeed limit (parameter DP) as needed.
