

TECHNICAL BULLETIN TR - 06 (REV)

DATE: JANUARY 7, 2002
MODEL YEAR: ALL
TRANSMISSION MODEL: ALL MANUAL
BULLETIN #: TR - 06 (REV)

FILE IN TRANSMISSION SECTION OF TECHNICAL BULLETIN BINDER (DISCARD PREVIOUS TECHNICAL BULLETIN DATED 01/11/94)

RECOMMENDED LUBRICANT FOR NISSAN DIESEL MANUAL TRANSMISSIONS

PURPOSE

To announce the availability of Genuine UD part number UDXG32, API Grade GL-4 80W90 gear oil, for use in MES50C, MHS61A, MLS61B, MPS62T and all other Nissan Diesel manual transmissions.

RECOMMENDATION

Nissan Diesel Motor Co., Ltd. and Nissan Diesel America, Inc. recommend the use of GL-4 gear oil in all Nissan Diesel manual transmissions. The use of any other API grade gear oil may not allow the transmission to operate as designed or achieve the service life expected by the customer. Therefore, when performing normal preventative maintenance on Nissan Diesel manual transmissions, the dealer is strongly encouraged to use only Genuine UD part number UDXG32, API Grade GL-4 80W90 gear oil.

INFORMATION

Genuine UD part number UDXG32 is now available in 32 fl. oz. containers and packaged in 12 containers to the case. All UD Dealers will receive an initial stock of five cases (60 containers) of this product in the first week of January, 2002.

WARRANTY NOTICE

Only Genuine UD part number UDXG32, API Grade GL-4 80W90 gear oil, will be allowed on UD warranty or service policy claims for repairs performed on or after January 14, 2002. The "TRANS OIL" option will be removed from the Sublet Selection Menu on February 14, 2002.

CAUTION: Do not use GL-4 gear oil in the differential. Use only the specified lubricant, API Grade GL-5 gear oil, in the differential.

THE INFORMATION CONTAINED IN THIS BULLETIN SHOULD NOT BE CONSIDERED THE BASIS FOR WARRANTY CLAIMS
